

PRESS RELEASE

**S&W Seed Company and Calyxt, Inc. Announce
Alfalfa Seed Collaboration**

*Companies to apply next generation gene editing technology to
the alfalfa seed industry*

FRESNO, California and NEW BRIGHTON, Minnesota – June 9, 2015 – S&W Seed Company (Nasdaq: SANW), a leading provider of seed genetics, production, processing and marketing for the alfalfa seed market, and Calyxt, Inc., a Minnesota-based company focusing on developing healthier food products, and a wholly owned subsidiary of Collectis (Nasdaq: CLLS, Alternext: ALCLS), today announced they have entered into a collaboration agreement to research, develop, produce, and commercialize alfalfa seed products involving next generation gene editing technology on S&W’s industry leading alfalfa seed genetics. Calyxt’s technology allows for the custom gene-editing of plant species to create novel traits and increase value.

In particular, Calyxt will be applying its patented nuclease technology to develop a series of alfalfa seed products based on editing of native genes to improve the agronomic and quality value of alfalfa for the food and agriculture industries. The approach is based on the same principle as classical cross-breeding of different plants, however the gene editing technology developed by Calyxt dramatically accelerates the development timeline. The targeted approach of gene editing is more predictable and reliable than traditional breeding and can also be much more cost effective. The companies will look to commercialize products through S&W and Calyxt’s distribution channels with pre-defined financial terms.

Mark Grewal, Chief executive officer of S&W Seed Company commented, “This agreement with Calyxt continues to position S&W at the forefront of alfalfa seed research and development. The Calyxt technology allows for the development of unique traits in alfalfa seeds. The ability to provide enhanced traits in alfalfa seed varieties opens up what we believe will be a significant opportunity for us, our partners, and Calyxt. The world will continue to need varieties that can drive increases in productivity, while decreasing input costs to meet global demands. Our goal at S&W is to meet those challenges.”

Luc Mathis, Chief executive officer of Calyxt commented, "S&W Seed Company is a great partner for us to address the alfalfa market, combining the ability to generate new traits into superior genetics, with a clear path to market. The partnership fits well with our vision of bringing higher quality products also for the feed industry."

About Calyxt

Founded in 2010, Calyxt, Inc. (previously Collectis Plant Sciences, Inc.) is based in New Brighton, Minnesota (USA). The company aims to create healthier crop products such as high-oleic/low trans fat soybean oil, cold-storable potato, gluten reduced wheat and low saturated fat canola oil for the food and agriculture industries. Calyxt is developing a network of partnerships in order to secure accessibility of its food products to consumers. For further information please visit our website: www.calyxt.com

Calyxt™ and the corporate logo are trademarks owned by Calyxt, Inc. TALEN® is a registered trademark owned by Collectis Group.

About S&W Seed Company

Founded in 1980, S&W Seed Company is a global agricultural company, headquartered in Fresno, California. The Company's vision is to be the world's preferred proprietary seed company which supplies a range of forage and specialty crop products that supports the growing global demand for animal proteins and healthier consumer diets. The Company is the global leader in alfalfa seed, with unrivaled research and development, production and distribution capabilities. S&W's capabilities span the world's alfalfa seed production regions with operations in the San Joaquin and Imperial Valleys of California, five other U.S. states, Australia, and three provinces in Canada, and S&W sells its seed products in more than 25 countries around the globe. Additionally, the Company is utilizing its research and breeding expertise to develop and produce stevia, the all-natural, zero calorie sweetener for the food and beverage industry.
